

# ABIGAIL HALL

Software Engineer | Python | Java | Collaborative Coder

+1-(234)-555-1234 | help@enhancv.com | linkedin.com | San Antonio, Texas

## SUMMARY

Eager to contribute as an Entry-Level Software Engineer with Innovatech Solutions, emphasizing effective problem-solving and collaborative teamwork to deliver high-quality software. Proficient in Python, Java, and C++, with an interest in enhancing digital solutions through innovative design and code maintenance. Striving for excellence in software engineering with a commitment to professional growth within the tech industry.

## EXPERIENCE

### Software Engineering Intern

TechFlex Innovations

01/2026 - 01/2026 | Austin, Texas

- Developed a feature for a web application using Python and Java, which improved user engagement by 20% over two months.
- Collaborated with senior developers to implement a responsive interface design, enhancing user accessibility by 15%.
- Participated in weekly code reviews, providing feedback that reduced bug instances in team projects by 30%.
- Implemented automated tests for web applications, leading to a 25% increase in the detection of UI inconsistencies.
- Documented technical specifications and process workflows, advancing team understanding and development consistency.
- Engaged in team Agile rituals, contributing to sprint planning and retrospective improvements.

### Open-Source Contributor

GitHub

01/2026 - 01/2026 | Remote

- Contributed to an open-source web development library, attracting 50 new users in less than three months.
- Enhanced code functionality to improve performance benchmarks by 10%, using collaborative principles with remote contributors.
- Developed user-friendly documentation for library APIs, making the project more accessible to the global community.
- Engaged with developer forums to troubleshoot critical issues, improving community response and engagement.

## TRAINING / COURSES

Full-Stack Web Development  
Certification

Issued by Codecademy, 2025

AWS Cloud Practitioner  
Essentials

Issued by Amazon Web Services,  
2025

Java Programming and  
Software Engineering  
Fundamentals

Issued by Duke University, 2024

## STRENGTHS

### Adaptive Problem-Solving

Applied data-driven approaches to optimize a platform's performance by 20% through innovative coding solutions.

### Collaborative Mindset

Worked closely with cross-functional teams to design solutions, valuing the exchange of ideas and expertise.

## VOLUNTEERING

### Volunteer Web Developer

Girls Who Code

01/2025 - 01/2026

- Assisted in coding workshops, sparking interest in technology among young girls.
- Utilized JavaScript frameworks to develop an interactive learning platform for newcomers.
- Mentored a group of students, fostering skills in programming and problem-solving.
- Collaborated with a team to organize community events, enhancing local tech engagement.

## EDUCATION

### Bachelor of Science in Computer Science

The University of Texas at San Antonio

01/2022 - 01/2026 | San Antonio, Texas

## LANGUAGES

English

Native

Spanish

Advanced

## SKILLS

Python

Java

C++

HTML

CSS

JavaScript

## INTERESTS

### Open-Source Software Development

Enjoy contributing to and collaborating on software projects to make technology accessible to everyone.

### Artificial Intelligence

Fascinated by the potential of AI to transform industry and improve quality of life on a broad spectrum.

### Reading Science Fiction Literature

Inspired by futuristic narratives and the imaginative possibilities of technology in storytelling.
